**Empty Paint Can 500 ml** A tough steel paint can ideal for decanting and storing excess paint. Leaving paint in half-full cans will normally result in them going hard over time. Decanting into these small cans with no air gap will preserve expensive paints and varnishes.

## MIXING AND STIRRING

### Stirring things up

Stirring paint really is important, a quick shake of the can simply won't do! As much as the manufacturers try, the different chemicals in the paint will tend to settle out. All the matting or bonding agents may be at the bottom of the can giving you a patchy or translucent finish with poor adhesion. Please give your paint a chance.

FILLING KNIVES AND SCRAPERS

One of my personal favourites. Sad but true!

**Bahco Wolfram Carbide Scraper** They leave all other scrapers in their wake. Ergonomically designed for comfort, control and power, they will cut through layers of paint even without the need for heat or strippers. The special double-sided carbide blades retain their super hard edges and the slightly convex shape avoids corner

damage. The smaller pocket scraper is supplied with a triangular blade [▲] for getting into tight corners. The blade can be turned to show a fresh edge. You can also purchase a handy pear-shaped blade which can be reversed for either a sharp point or a round profile making it ideal for mouldings or cove lines.

✓ These scrapers are highly effective and worth every penny!
