

GILDING

DUTCH METAL

Scenic artist Anna Stamper gilded this wall with Dutch Metal for the entrance of the 'Beyond El Dorado' exhibition at the British Museum.

Dutch Metal An economic substitute for real gold and silver leaf. It is available as loose leaf or transfer. The transfer is pressed onto tissue paper and is easier to apply, but we have heard it can resist some protective glazes. If you are going to protect your gilding with Bona Mega [page 46] we recommend using loose leaf. Metal Leaf Lacquer , Rylands Brass Lacquer [page 37] and Renaissance Wax [page 52] will also protect your gilding. We can supply all types of leaf including Italian, English and German real gold plus copper and silver. Please phone for a quote. One book of Dutch Metal will cover a maximum of 0.49 m². Sheet size is 140 x 140 mm.

Silver	50 m	150 mm	PATDMRS	£68.17

The art to a good quality finish is in the preparation. The size should be applied to a perfectly smooth base as the slightest imperfection will show in the final work. If applying to a red oxide painted surface [page 30], prepare the substrate by sanding with 400 - 600 grit abrasive paper and remove all the dust with a Tack Rag [page 72]. The size should be applied with a soft brush held at 45° to the stroke to avoid brush marks. The leaf should be applied to the size while it is still just tacky. The drier the size, the brighter the shine but too dry and the leaf will not adhere. A taut knuckle when rubbed across the size should produce a slight squeak when the size is ready. METALLIC FOIL LEAF

Metallic Foil Leaf This popular product consists of an extremely thin metal transfer foil on a plastic backing measuring approximately 640 mm wide [widths can vary slightly] and 15 m or 122 m long. To use, apply two coats of a water-based size such as Polyvine size to the item to be gilded. Allow to dry and then place the foil onto the size with the metallic side up and rub it hard with a damp cloth. The protective backing can then be peeled away leaving a realistic worn metallic finish. Cut off the selvage prior to use to avoid any discoloured edge from showing. The benefits of using this foil over Dutch Metal are that it will not show up the small square pattern associated with using small leaves and this foil will not tarnish. Available in ten brilliant metallic colours.
