

HAUSSMANN LEATHER PAINT

Haussmann Leather Paint This water-based paint can be applied direct to leather, artificial leathers, PVC films and fabrics. A useful product for any propmaker or costumier - perfect for detailed leather work, or to simply change the colour of a pair of shoes on set or the runway. It works especially well with soft ballet slippers providing lasting results. Prepare the leather surface thoroughly with White Spirit [page 53] first to degrease. Semi-matt finish.

SPECIFICATION: Coverage: 6-7 m²/L. To reduce the intensity of the colour, thin using the colourless paint.

HATO®SPRILA

HATO®Sprila Designed for use on silks with a sheen, these water-based paints will maintain the material's lustre, rather than mattifying it down. When used straight out of the pot, HATO®Sprila will not bleed at all. It has a very thin consistency which makes it suitable to spray as well as paint by brush. To reduce the intensity of the colour, dilute with the colourless HATO®Sprila [we tried water, but found it started to bleed heavily making it impossible to achieve a clean line]. When using on FR fabrics [page 117] ensure the fabric has been washed and completely dried before applying the HATO®Sprila, as the salts from the Flame Retardant can interact negatively with the paints. Always do a test first. Once dry, the finished article can be washed on a gentle cycle with a mild detergent [30°C] without affecting the finish. We think this product would work well for costumiers and window dressers who need to maintain the finish of the fabric they are working with, without affecting the fabric's hand.

SPECIFICATION: Coverage 6-8 m²/L Dilute with Colourless.
