A non-slip solution that adds a slip resistant surface to all floor surfaces, including wood, vinyl, tile and linoleum. Widely used by theatre, opera and dance companies. The perfect substitute for rosin [which is not recommended on vinyl floors]. It will not damage any surface. You can control the degree of non-slip simply by adding water. Dilute ten times for the usual mix. One pot will cover approximately 900 m<sup>2</sup> once diluted. The treatment will normally last up to a week, after which it should be cleaned off with warm water and a new application made.

## NON-SLIP FABRIC TREATMENTS

### Weave Filler 916, & 916 SE [Flame Retardant]

These weave fillers are highly elastic materials which are primarily designed to fill open weave textiles such as scenic gauzes and strawberry netting. They are also widely used to provide a reliable non-slip surface to the underside of rugs, druggets, carpets, stage cloths etc. They enable scenes to be quickly set because cloths will flop down and grip the stage floor without needing tacking out or taping. Also useful to prevent fraying to

cloths. The flame retarding chemical used in the 916 SE flame retardant version may discolour some dark coloured materials so please undertake a test before using. Also, the 916 SE flame retardant version is only available in 10 kg size and has a 6 month shelf life, so please buy as required.

## NON-SLIP FABRICS

**Black Non-Slip Fabric** Made from an eco-friendly patented material [ECO PER® Polymer Environmental Resin] which offers a flexible, non-toxic matting which is free of rubber and latex, odourless

and does not emit any toxic chemicals or gases. Ideal for preventing props from slipping during scene changes, preventing floor cloths from skidding and even for integration to costumes or shoes for special stunt purposes. Thickness: 1.4 mm.

- ✓ Non-slip – simply, it helps prevent items from moving or sliding. The open weave structure is free-draining so the fabric is an effective non-slip surface even when wet
- ✓ Non-stick – grips without sticking
- ✓ Flame Retardant and UV stable – making it safer when used in confined places and retaining its original colour even with outside use
- ✓ Toxin-free and non-allergenic – certified to Oeko-Tex Standard 100, Class 1 [baby articles]; USA FDA tested by SGS [CY/2007/10529A]
- ✓ Biodegradable – the fabric will decompose within the natural environment
- ✓ Odourless – this matting does not have the strong solvent odour generally associated with PVC-based products
- ✓ Secure and safe on all surfaces – no adverse effects on polyurethane and lacquered surfaces
- ✓ Hygienic and easy to clean – it can even be machine washed
- ✓ Cushioned and soft – nice to handle, as well as protecting surfaces and items from chipping and scratching
- ✓ Can be sewn – ideal for applications where the fabric is to be integrated with other materials, i.e. druggets, floor cloths, costumes etc.
- ✓ Open weave structure – allows for air circulation and free draining
- ✓ Mould and mildew resistant – hard wearing and long-lasting

**Got a slippery problem?**  
Over the years Flints has carried out many experiments on various non-slip products. We know what is available, what works and what doesn't work. We know of products that will adhere to dance floors and products that can be used in wet conditions. So if you have a particular problem just give us a ring.
