FLUORESCENT

These vivid, vinyl acrylic colours are brilliant in normal light and glow brightly when bathed in ultra-violet light. White fluoresces a light blue under black light. Invisible blue appears milky white under normal light but glows blue in ultraviolet.

05779 WHITE

05782 YELLOW

05781 ORANGE

05780 RED

05786 PINK

05784 BLUE

05783 GREEN

05785 INVISIBLE BLUE

VIVIDFX

The VividFX series of colours combines a wide palette of 13 colours, brilliant fluorescence and one coat coverage and opacity in one remarkable paint formulation. These exceptional pigments create stunning blacklight effects and intermix cleanly to provide a wide array of intermediate fluorescent hues.

Premiere Clear

An advanced, water-borne urethane coating suitable for sealing and protecting painted finishes, floors, and high-traffic surfaces. When cured, this clear finish provides long-lasting durability, hardness, and abrasion resistance in an environmentally safe, VOC compliant coating. Premiere Clear is virtually odourless and may be thinned with water. In addition to protective top coats, Premiere Clear is excellent for use in faux finish or glazing applications.

Clear Gloss & Flat Acrylic Glazes™

These clear acrylic mediums are designed to be diluted with water and applied as an overcoat to a painted surface or they can be mixed with the paints for additional binder strength. Rosco Clear Acrylics are compatible with all of Rosco's scenic paint systems and most other water extendable paints. They also serve as a binder for dry pigments and bronzing powders.

Tough Prime™

A unique water-based primer with special adhesion properties that allow it to bond to the hard-to-prime scenic materials found in every scene shop. This quick drying, acrylic emulsion primer dries to a tough, durable coating which can be painted over with any paint and is excellent for both interior and exterior use.

Foamcoat™

A water-based, flame retardant, protective coating for all rigid foams. An acrylic slurry the consistency of wet plaster, Foamcoat dries to a super hard, durable coating that resists chipping and cracking, yet can be sanded smooth or carved with detailing.

Flexcoat™

A flexible, non-toxic, water-based coating for polyurethane and polystyrene foam. Its 100% acrylic formulation provides excellent adhesion to a wide variety of substrates. It is compatible with all Rosco paints used either as tints or surface coatings. Flexcoat is weatherproof and fire retardant.

Flexbond™

A clear, flexible scenic glue which bonds many porous and non-porous scenic materials. Dries to a clear, hard, yet pliable coating. Unlike ordinary "white" glues which can crack and break when flexed, the adhesive bond of Rosco FlexBond remains extremely pliable and strong even as the materials bend and deform. Rosco FlexBond is water based, and very safe to use, with little fume and low toxicity.

CrystalGel™

A non-toxic, water-based material which provides a clear, plastic-like coating on virtually any surface used in modern stagecraft. It air dries quickly — usually within hours — to a flexible, translucent surface. When dry, it can be painted with any Rosco scenic paint, or carved, or safely rolled without cracking or peeling. Such products as sand, sawdust or clay can be added to it to create unique textures.
